

**WILDERNESS
EXPERIENCE**
CHATSWORTH, CALIFORNIA

Arete

The Wilderness Experience ARETE is a good example that a pack can approach state of the art design and be a real dollar value under \$100.

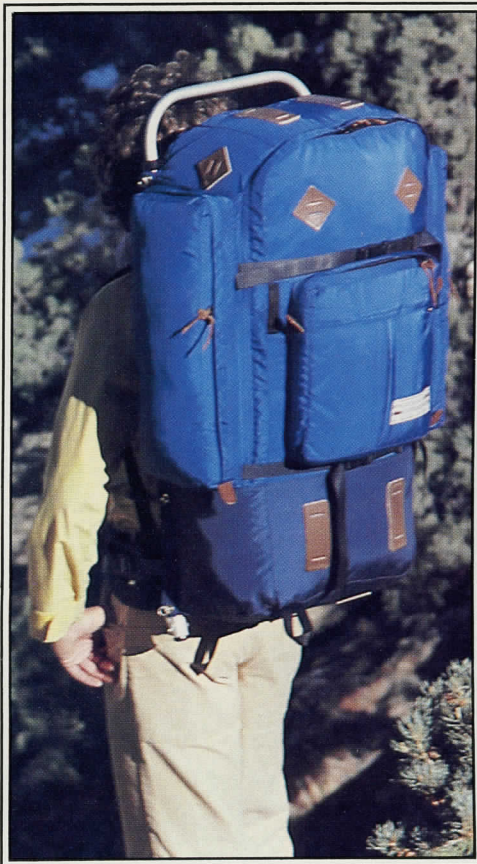

The ARETE is the perfect pack for extended trips. It can carry heavy loads

because it shares the suspension system found in our expedition grade ALPINIST series.

The load is easily accessible through the fully zippered front panel. Stress is kept from the zipper by two compression straps which also align the load with the internal stays even when the load size varies.

Capacity: 3905 Cu. In.
Weight: 78 Oz.

Titan

The TITAN is our answer to those who asked for the design features found in our popular ARETE yet demanded the volume and weight carrying capacity of an external frame.

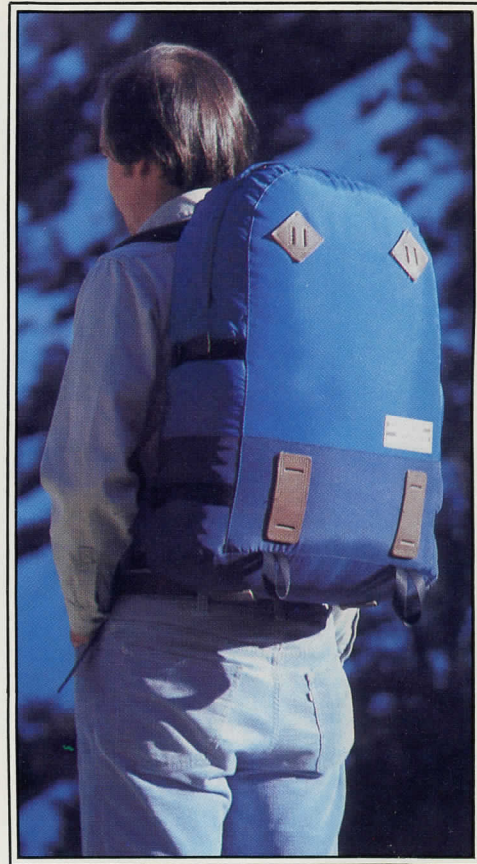

A large capacity, panel-loading main compartment gives ample room for those planning extended wilderness trips. Compression straps bring the load into alignment with the frame when underfilled and relieve strain from the tough YKK zipper.

While one large compartment, the bottom of the TITAN's body is serviceable as storage space for a sleeping bag. Further complimenting the volume of the pack are side pockets which conceal full ski slots.

This beautifully designed pack is mounted on our famous "S" frame featuring a full mesh backband, wrap-around hipbelt, and generously padded shoulder straps. The pack bag is constructed of eight-ounce Super K-Kote nylon pack cloth, a tightly woven, extremely waterproof fabric.

On the back panel we have mounted an outsized pocket to which is sewn a gusseted flat pocket. Combined with numerous lash points, the TITAN is ready to carry the largest of loads.

Capacity: 6010 Cu. In.
Weight: 89 Oz.

Darkstar

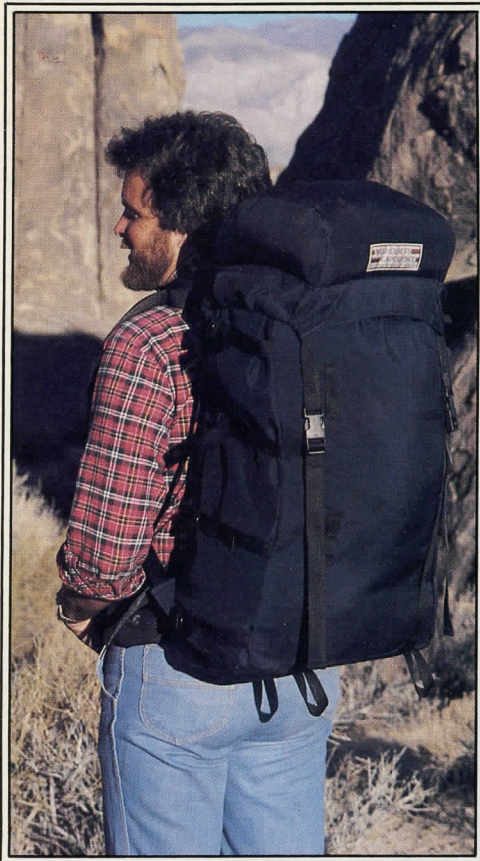

The DARKSTAR is for the hut hopper, the climber, and the ski mountaineer. This versatility of design makes the large volume rucksack special.

For the ski mountaineer the side compression straps can serve as ski attachment points, while the climber will find them useful in controlling his ever changing load. The hut hopper has plenty of room within this front zip panel loader to spend several days in the field.

No matter how heavy the load the DARKSTAR can handle it. Not only are the padded shoulder straps wide but the entire back contains a removable foam pad. Our answer for a cold seat or heavy head.

Capacity: 2805 Cu. In.
Weight: 20 Oz.

The Alpinist

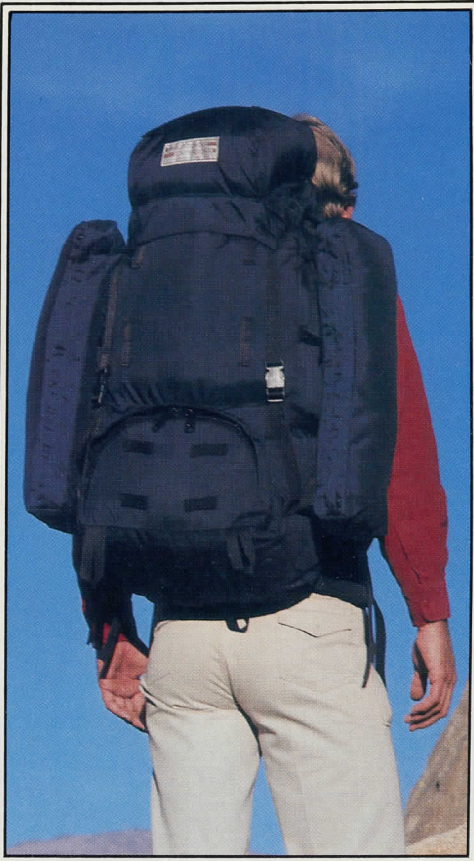

The ALPINIST is a large single compartment mountaineering pack. Four nylon compression straps on each side of the main body adjust to securely fit the size of the load. These efficient compression straps are also a very convenient

means of attaching skis. The self-adjusting, double compartment top pocket securely fastens to seal out any hard blowing snow or spindrift. The special highly waterproof 800 denier magnum cloth is both light and highly abrasion resistant.

At the beginning of a long Alpine ascent the ALPINIST can be over-packed by extending the waterproof nylon bivy skirt and raising the adjustable top pocket.

Capacity: 5084 Cu. In.
Weight: 80 Oz.

The Quicksilver

The QUICKSILVER was conceived and designed to be used on the most difficult Alpine faces, but for the same reasons it makes such a great climbing pack it also makes a superb back-country and ski mountaineering pack.

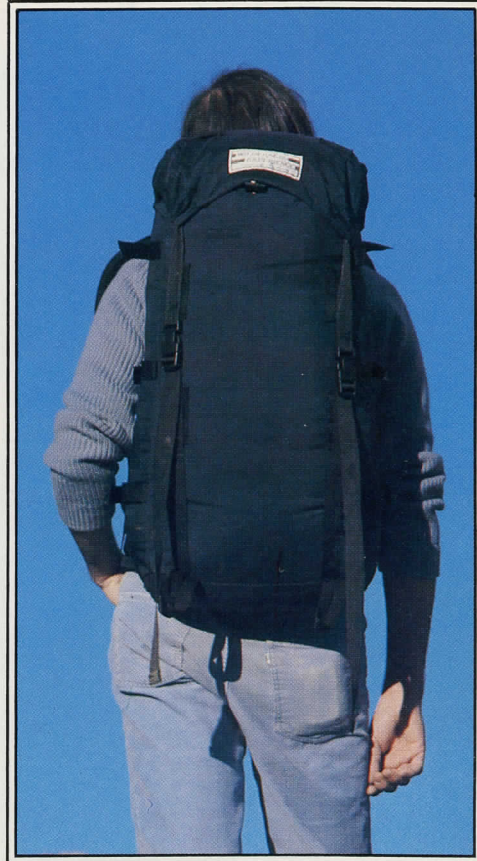

The QUICKSILVER is a modified Alpinist design. It is a little larger in capacity and is divided into two compartments with a zippered divider that zips out, turning the QUICKSILVER into a large single compartment pack when required. Eight compression straps conform the QUICKSILVER to any size load.

A large waterproof nylon extension, designed to be used in bivouac conditions, also adds that extra capacity so often needed for winter camping.

The QUICKSILVER suspension system adjusts to make every fit a custom fit. It's this exact fitting process that results in an extremely comfortable carrying pack.

A uniquely designed, lightweight 6061 T6 aluminum internal frame system supplies the needed rigidity and stable support that eliminates any unbalanced shifting. The stable, controlled load system makes the QUICKSILVER an excellent mountaineering pack.

Capacity: 5084 Cu. In.
Weight: 83 Oz.

The Ice Nine

For the quickest of Alpine ascents, where timing and speed make the difference between success and failure, the ICE NINE is in a class by itself. Designed to be the most advanced Alpine rucksack available, the ICE NINE'S superb carrying characteristics are a result of a combination of unique factors: it's fully padded foam back, its lightweight removable internal frame system, a completely adjustable suspension and a load supporting, padded, quick release Fastex® waist-belt.

The waterproofed nylon bivy skirt can be fully extended and still be completely covered by a unique adjustable zippered top pocket.

Capacity: 2856 Cu. In.
Weight: 59 Oz.

Meadow

Popular, durable and comfortable! After five years the functionally well-designed MEADOW is still our best selling day pack. Fully foam padded shoulder straps and a quick release Fastex® adjustable waistbelt keep the MEADOW both comfortable and stable when bicycling. Made from 11.5 ounce waterproofed cordura nylon, the MEADOW will practically last forever.

With its handy zippered top pocket, its large open main compartment, and a spacious zippered back pocket, there's more than enough room for extras.

Capacity: 1038 Cu. In.

Weight: 14 Oz.

Tundra

A lot of pack for the money, the TUNDRA combines highest quality materials and workmanship into an extremely roomy daypack at a very affordable price. Access to the main compartment is by way of a top drawstring and cordlock covered by a Fastex® buckled weather flap. The outside front pocket is closed by a continuous coil zipper and is perfect for those small easily misplaced items.

Capacity: 909 Cu. In.

Weight: 12 Oz.

High Country

The HIGH COUNTRY is a spacious, quality day pack designed for those who desire extra carrying capacity without the external bulk of a larger pack. The entire front panel unzips via a continuous coil double pull YKK® zipper to reveal all the contents.

This feature, plus the additional oversized zippered pocket, means no more searching to find a small item in the bottom of your pack. The HIGH COUNTRY is constructed of 11.5 ounce waterproofed cordura nylon to last indefinitely. Other features include leather accessory patches, adjustable waist belt and foam padded shoulder straps.

Capacity: 1160 Cu. In.

Weight: 19 Oz.

Bike Pack

Our versatile BIKE PACK has played to rave reviews on college campuses, hiking trails, and super highways. The original BIKE PACK constructed of eight-ounce nylon pack cloth has been joined by the DELUXE BIKE PACK made with 11.5 oz. cordura and featuring padded shoulder straps.

Both have a main compartment large enough to hold two full size notebooks with plenty of supplies. The zippered back pocket can hold all of a busy persons small essentials. Since this design is fully closed with zippers there is no worry about losing items from the pack when it gets thrown around.

The BIKE PACK is designed to ride high on the back which is the best position for bike riding. A webbing waistband keeps the pack from swinging. Soft two-inch webbing shoulder straps cushion the load on the BIKE PACK. Shoulder straps padded with long lasting neoprene rubber carry the load on the DELUXE BIKE PACK

Capacity: 513 Cu. In.
Weight: Reg., 8 Oz. Deluxe, 13 Oz.

Prairie

If you desire a large, sturdy cordura daypack yet are operating with a tight budget the PRAIRIE is the pack for you.

Soft, two-inch webbing shoulder straps and comfortable waistbelt make the PRAIRIE capable of carrying a heavy load. Access to its contents is easily obtained through the top-zipped opening. The sturdy 11.5 oz. cordura used in the PRAIRIE will keep wearing long after the knowledge gleaned from the books it carried has brought success.

Capacity: 993 Cu. In.
Weight: 14 Oz.

Summit

When the basecamp is left behind and the top is your objective then our large volume SUMMIT pack should be on your back.

Large enough to carry all the gear you will need for the final push the SUMMIT has wide, padded shoulder straps so you can concentrate on the work ahead and not the discomfort of your pack.

Essentially a modified teardrop design the pack's contents are easily accessible through a sweeping top zipper.

Capacity: 1047 Cu. In.
Weight: 16 Oz.

Hummingbird

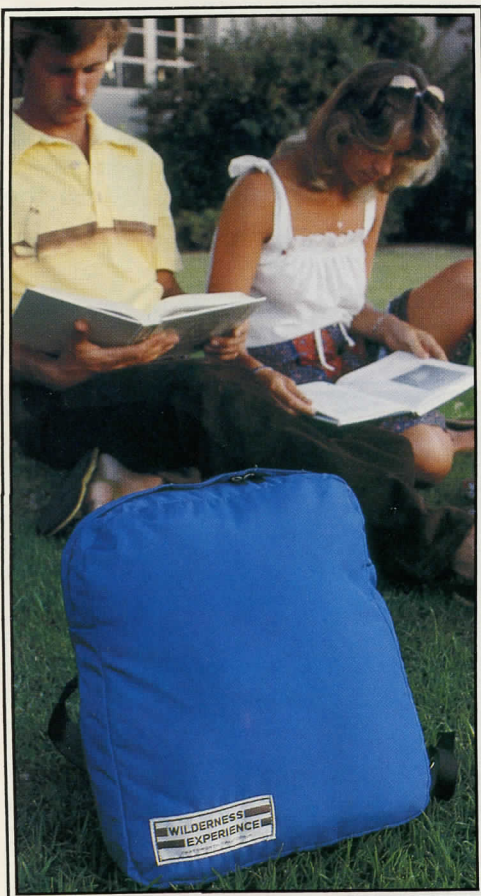

If you're an outdoor individual who enjoys spending days endlessly searching for those hidden little treasures so often found on a day's adventure, you'll find the HUMMINGBIRD will be the perfect partner.

A diagonally zippered back pocket is what sets the HUMMINGBIRD apart from all our other packs. Available in both parapak or cordura, this modified Teardrop pack is an excellent choice for any type of excursion. A large main compartment that opens fully across the top, an adjustable waist belt, makes this pack a must for the person on the go.

Capacity: 850 Cu. In.

Weight: Parapak - 9 Oz.

Cordura - 16 Oz.

Gnome

Here's a pack that has a lot of carrying space and is the newest addition to our day pack line. Designed for the person who likes to spend a whole day at the zoo, the Gnome offers features such as the "magazine slash pocket," a most convenient place for magazines, newspapers, tickets, or your racquetball racquet. The slash pocket lets you quickly slide things in and out without digging through your pack.

The main compartment has a deceptively large capacity, giving you plenty of completely zipper-closed storage. The Wilderness Experience® GNOME pack is made from abrasion resistant parapak nylon making a lightweight but very dependable pack. With 2" soft webbing shoulder straps and the excellent Wilderness Experience® sewing quality the GNOME is the ideal choice for around town.

Capacity: 879 Cu. In.

Weight: 10 Oz.

Tumbleweed

"Practical" is the best word to describe the TUMBLEWEED DAY PACK. This single compartment bag opens through a zippered top. Soft nylon webbing shoulder straps and our waterproofed high count pack cloth make this pack a high quality, easily affordable companion for any student. At home on a short bike ride or on an overnight fling, the TUMBLEWEED is ready to handle any situation.

Capacity: 446 Cu. In.

Weight: 7 Oz.

Magic Pack

MAGIC is the only word that seemed to fit this truly unique pack which, at the flick of a wrist, folds into a tiny waist pouch and, just as quickly, reappears as a full sized daypack.

When folded out the MAGIC will hold a sweater and a lunch for the hungriest hiker. This very same pack when folded into the zippered slash pocket becomes a belt pouch for several small items or stows in the smallest corner of the mountaineer's basecamp pack.

As a pack the MAGIC's contents are easily reached through the top flap which features a zippered map pocket. The shoulder straps are soft, two-inch wide webbing. Constructed of eight-ounce pack cloth the MAGIC is a creative addition to anyone's backpacking gear.

Capacity: 1040 Cu. In.
Weight: 14 Oz.

Standard Fanny Pack

As simple as putting on a belt, our FANNY PACKS will offer you a variety of uses. If you need room to carry a lunch and a few extra items, our STANDARD FANNY PACK will be your perfect companion. Made of the highest quality materials available, the STANDARD FANNY PACK will last you a lifetime.

Cross Country Fanny Pack

The CROSS COUNTRY FANNY PACK offers a few more extras than the Standard Fanny Pack. Handy zippered, side-flap compartments are ideal for such small items as a roll of film, chapstick, or a few pieces of candy. Leather accessory patches have been added to the top of the larger volume main compartment to help hold any extras you might need to strap on. We use only the finest materials in constructing these all purpose touring belt packs.

Mutt Belt Pouch

The MUTT is a larger style belt pouch. It offers over twice the room as the Jeff and has a convenient side-zippered pocket. If you're looking for an easy way to carry extra lenses for your camera and an extra roll of film, the MUTT can offer you the freedom of movement and the quick availability of a small belt pouch.

Jeff Belt Pouch

If an extra pocket is all you need to carry those additional goodies, the JEFF BELT POUCH is just what you're looking for. By simply attaching the JEFF BELT POUCH to your belt, you'll have the ideal carry-all for those small but necessary items. When you find yourself looking for an extra spot to put a passport, wallet or even a compass, this convenient hip compartment seems to be the all around solution.

Nighttime Safety With Early Warning

Safety is serious business. In the past safe translated as gaudy. Only highway workers liked dayglo reflective gear festooning their body.

Now, thanks to the 3M Company, technology does a favor for the nighttime bicyclist or traveler. Their new Early Warning Fabric has a Scotchlite Brand reflective finish applied to the entirety of the material.

This unique material consists of millions of retroreflective microspheres which act as tiny mirrors. When they are illuminated by something such as a headlight they reflect the image directly back to the source. Early Warning is unique to safety fabrics in that a pack made with it reveals itself as a bright silver object **just** to the source of the light. So, the good looking pack you feel comfortable wearing during the day is a startling silhouette at night that might just save your life.

Wilderness Experience uses Early Warning fabric in four of our most popular daypack designs: The full panel zip HIGH COUNTRY, the top zippered and loading SUMMIT, the convenient and popular BIKE PACK, and the top loading HONEY BEE for children.

Every pack that we construct of this extraordinary fabric is designed for visibility from every direction—even standing on your head. Every panel of the pack is Early Warning with the exception of the eight ounce packcloth back. The soft nylon packcloth is your insurance the pack won't chafe your back on a long hike.

Safety, expert design, and quality craftsmanship make these the perfect packs for populated places.

The Packs Selected

When selecting the designs for our offering in the exciting new safety fabric Early Warning, we knew we wanted to make it available to the widest number of people. Safety knows no age, size, or price limits.

The HIGH COUNTRY is the largest of the Early Warning packs and opens via a double pull YKK zipper along the entire front panel.

The top zip opening SUMMIT is a modified teardrop design that offers large volume at a value price. It also features a zippered pocket at the rear and padded shoulder straps.

For the nighttime bicyclist the best bet is the Early Warning BIKE PACK. An original Wilderness Experience design the pack has a large main compartment that will hold two notebooks and extra supplies.

Evening protection for youngsters is guaranteed with our HONEY BEE. This pack is a mini-rucksack with a quick opening top. It has a large main compartment and a handy back pocket.

Packs For Daring, Young Adventurers

Little Big Man

Backpacking is a sport where the entire family can share the fun equally, so . . . Wilderness Experience® has designed a kid's frame pack. It is an exceptionally sturdy and lightweight small backpacker's pack. The frame is a contoured 'S' frame made from the same 6061 T6 aircraft quality aluminum as are all of our adult frames. Small enough to fit properly, yet large enough to carry a complete outfit, the entire front opens like a suitcase making this pack bag very easy to pack and organize. Side pockets located towards the top of the pack offer additional area to carry those quickly-needed items. We use only YKK® coil zippers because we know you need to depend on the best. The LITTLE BIG MAN's frame has fully padded, adjustable shoulder straps and a complete full circling padded waistbelt. The LITTLE BIG MAN is the perfect pack to keep the young backpacker on the right trail.

Capacity: 1106 Cu. In.
Weight: 39 Oz.

Cricket

Long after Kenny has outgrown his sturdy CRICKET pack he wore at riverside he'll still experience the warm memories of his childhood. Those weekend hikes and family adventures will remain as exciting and wonderful as they are today.

For days like this we offer the CRICKET, a beautiful, high quality day pack designed for children between the ages of two and five. With its zippered front opening the CRICKET is perfect for holding toys, lunches, or school supplies.

Capacity: 220 Cu. In.
Weight: 4 Oz.

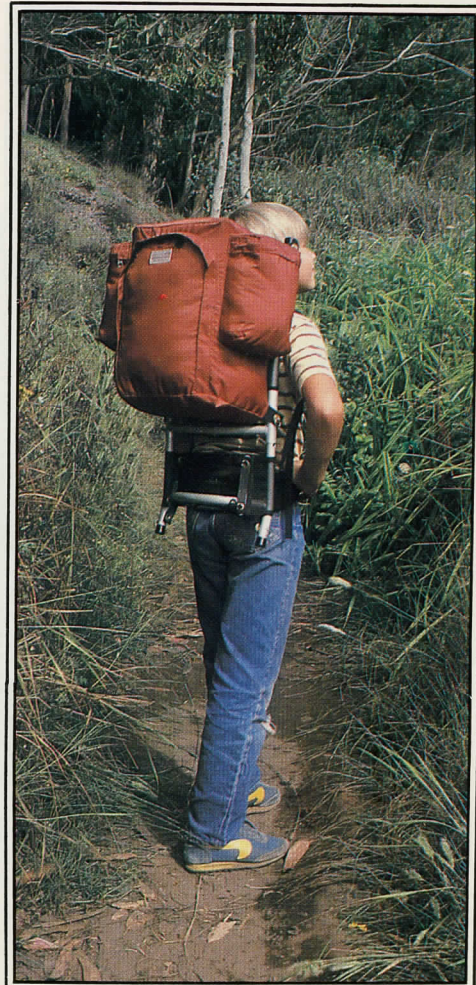

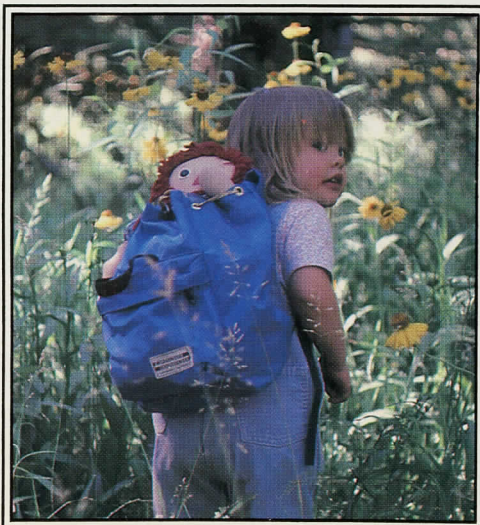

Honey Bee

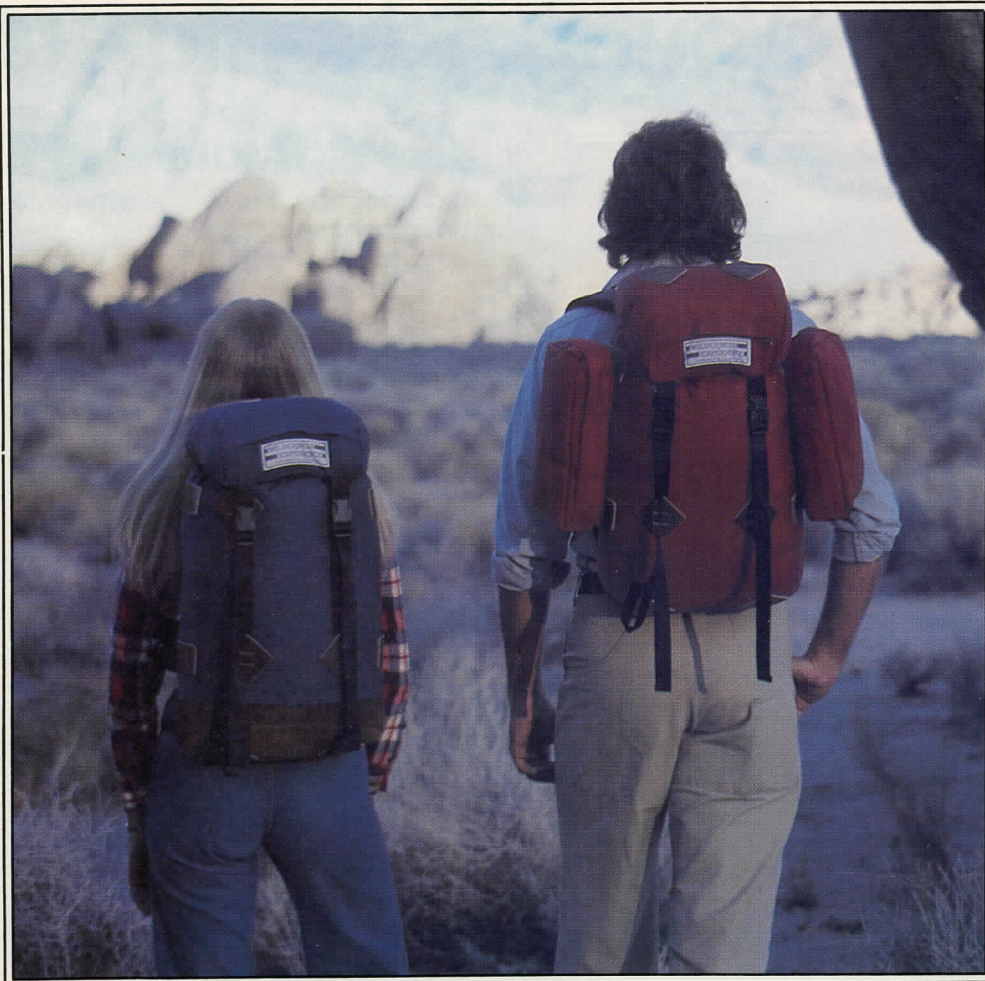

Dannielle's chosen the HONEY BEE for today's hike with her brother. She knows that its quick opening top gains entrance to a large main compartment loaded to the brim with a day's worth of snacks and a sweater to guard

against the night's chill.

A handy zippered back pocket helps to organize even the most unorganized child. Built to take rough use the HONEY BEE will last a lifetime of daring young adventures.

Capacity: 360 Cu. In.
Weight: 6 Oz.

Klettersack

"Kletter" means climbing. We designed this pack with the climber in mind, but with its clean lines and functional simplicity it finds friends in every camp.

The large flap pocket provides quick access storage. The padded shoulder straps and adjustable webbing waist-belt hold the pack in close while 6" wide foam, pads your back. Smooth nylon back and 11 ounce waterproofed cordura throughout can handle long rough use. All stress seams and zippers are double stitch reinforced or sewn six times where extra strength is needed.

The leather accessory patches on top, back, sides and bottom can accommodate various accessories from ice axes to skis. Removable side pockets are available for any situation requiring additional room. The classic climbing pack, the KLETTERSACK also is offered with an optional leather bottom for those who prefer it.

Capacity: 1600 Cu. In.

Weight: 24 Oz.

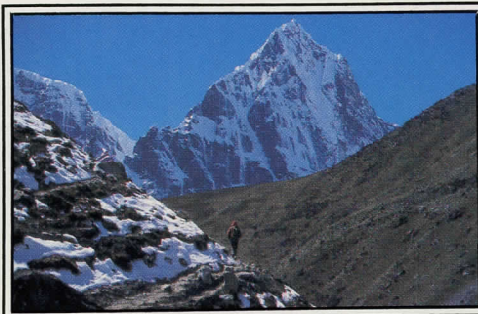

With leather bottom: 34 Oz.

Teardrop

For skiing, bicycling, and climbing, the TEARDROP offers durable dependability with classical teardrop styling. The bottom compartment is double pull zippered and the top main compartment zips open for easy front loading.

The foam padded shoulder strap, ice axe loop and leather strap patches give this pack the necessary accessories for climbing or overnight trips. The $\frac{3}{4}$ " adjustable webbing waistbelt keeps

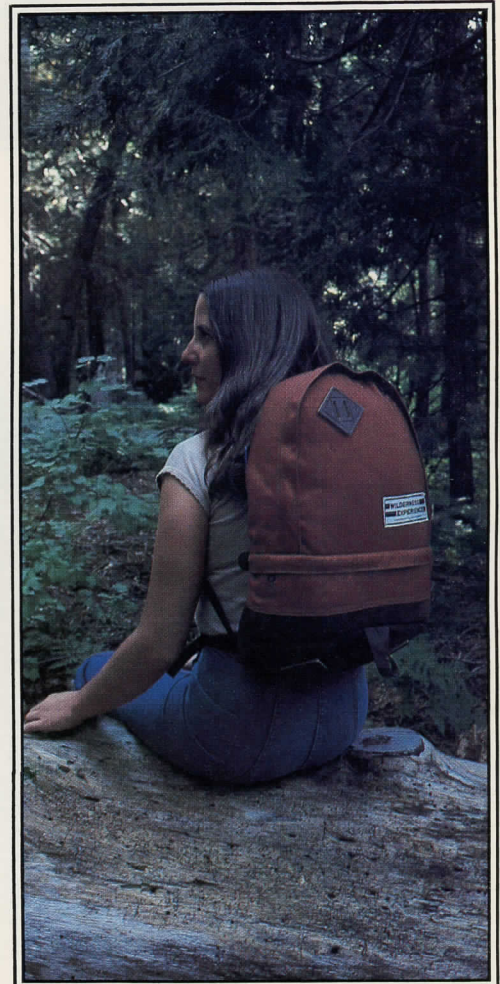

the TEARDROP snug to your back. The 11.5 ounce cordura pack is tough and waterproofed with a smooth, nylon back. If you find your fun on the rocks, we offer this pack with a leather bottom to take the bumps.

Capacity: 841 Cu. In.

Weight: 13 Oz.

With leather bottom: 23 Oz.

Vagabond

As the name implies, this pack is for anyone who likes to travel—whether on foot or skis. Made of 11.5 ounce cordura nylon, the VAGABOND has a large easy-to-get-to top pocket and three generous outside pockets for organized, yet simple packing.

A unique internal frame system that can easily be removed if desired, transfers weight to the padded waist belt. This system makes the VAGABOND carry more efficiently with heavier loads

Alpine

The ALPINE is a modified version of our fabulously successful Klettersack. The additions of attached side pockets with ski slots, an internal slash pocket, and waterproofed top extension, make this pack ideally suited for general use on overnight hikes and ski touring outings.

The large zippered flap pocket covers the drawstring closed top. The waterproofed extension allows quick access and provides security for the main compartment. The ALPINE is constructed of 11.5 ounce cordura nylon with a smooth nylon back to provide continued reliability under all conditions. The nine leather accessory patches and an ice axe loop will accept items too large to conveniently place inside. The foam padded back and shoulder straps contribute to the comfort of this pack. We also offer the ALPINE with a durable leather bottom.

Capacity: 1875 Cu. In.
Weight: 18 Oz. - With leather: 32 Oz.

than other packs its size. The aluminum stays should be bent to fit your back to achieve the best results. A nylon covered ½" foam pad not only protects your back from misplaced objects, but also makes this pack one of the most comfortable packs you can wear.

The VAGABOND comes with axe attachments, a haul loop and plenty of thick accessory patches so that nothing has to be left behind. Ski slots behind the side pockets make it easy to carry skis and poles.

Capacity: 2771 Cu. In.
Weight: 38 Oz.

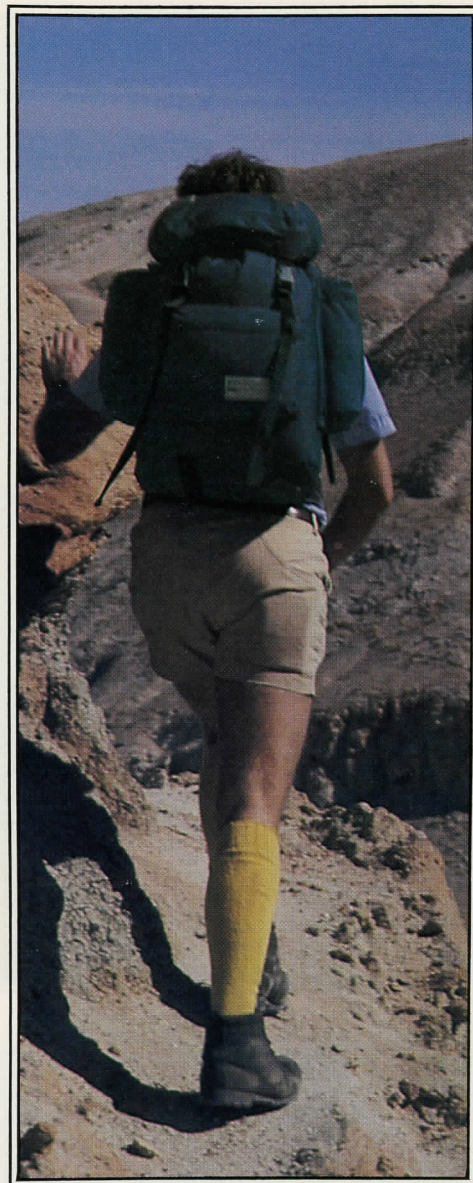

Chamonix

The CHAMONIX is possibly the most versatile mountain pack made. This internal frame pack has a waterproof, flared extension to allow for overstuffing or a quick bivouac.

It has a large four-inch deep zippered top pocket and has ski slots behind the side pockets. Adjustable straps act as pull-ups on the padded shoulder straps to eliminate backward load pull. The comfortable waistbelt takes the load transferred there by the internal aluminum stays which can be bent to fit the contour of the individual wearer.

The entire pack is constructed of 11.5 oz. cordura nylon with bottom being two layers. The CHAMONIX serves either the skier or climber well and the built-in Wilderness Experience quality makes sure the pack lasts forever.

Capacity: 2825 Cu. In.
Weight: 40 Oz.

Backpacker

The BACKPACKER is for the ardent hiker who prefers to travel off the trails, crossing rugged passes and boulder fields, but still wishes to carry more than a rucksack will hold. The BACKPACKER has the stability of an internal frame pack with a capacity equal to or surpassing most external frame packs.

Side pockets are sewn onto ski slots for easy carrying of skis and poles. The lower U-shaped zippered compartment will hold a large down or Polar-guard® bag, while the outside back and top pockets will hold many extras.

The BACKPACKER is constructed of 11.5 ounce cordura nylon with a flared waterproofed ripstop extension at the top for overpacking. The back is made of smooth eight ounce parapack nylon with a fully padded internal frame system that can be anatomically adjusted for a perfectly comfortable fit. Drawstring and cordlocks close both the extension and top compartments.

| | Capacity | Weight |

Europa

Constructed of waterproof 11.5 ounce cordura nylon, you needn't worry about your pack giving out on you as you cross the desert into Tangiers. The EUROPA utilizes constriction bands to keep the pack profile narrow when a less than full load is being carried. The constriction bands also provide a nice spot to hang a jacket or slide in snow shoes, etc. Available in sizes small, medium and large.

This is the finest traveling pack made. It has no metal frame ends to snag upholstery when you're hitchhiking. It is just small enough to put in an airport locker, and more than large enough for a year of vagabonding. The fully zippered front allows easy access for packing and complete organization. Three large outside pockets will hold all the items you want to be able to find in a hurry and leather accessory patches on the top and bottom are available if you need them.

The Classic External Frame Packs

All Wilderness Experience® packs are manufactured under one roof. We know that having complete control over assembling each and every pack is a tremendous asset.

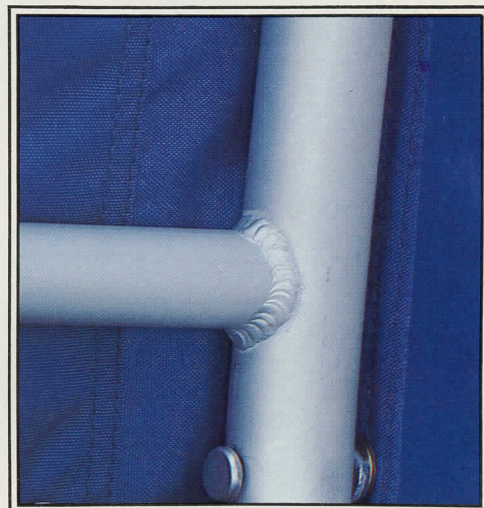

Not having to depend on outside services has proven to be a great convenience for us and a tremendous

advantage for you. The Wilderness Experience® craftsmanship that has made our packs some of the finest in the world, can be found in every step it takes to produce them.

Unlike other manufacturers, we have decided to produce our own frames. To do this we developed a complete metal shop. Our frames are all made of 6061 T6 aircraft quality, thick walled aluminum tubing and every joint is heliarc welded. This makes a frame pack that is much more than "strong enough" for the majority of backpackers; but the least thing you want is a pack that will last a lifetime and then not be able to stand up to the demands of your future interests.

One of the most important things in choosing the correct frame pack is to make sure you have the correct size. A lot of work has gone into designing, testing and manufacturing our external frame packs so that they will carry as perfectly as possible. But if you don't

have the correct size it is not going to work as well as it can.

We hope that when the time comes for you to purchase a frame pack, you will seriously consider us. We're sure you will find, as we have, that seeing the outdoors on foot is an experience you will want to repeat time after time.

Top Opening 'S' Frame

This is the most popular of all bag styles. The main compartment is divided in half by a horizontal floor. The top compartment is the larger of the two and should be used to carry your heavier equipment. Access to the bottom section is by way of a half moon double pull zippered opening.

There are five outside pockets and a convenient map pocket that can be reached without removing your pack.

The 'S' frame is a very efficient design for developing the proper forward concentration of pack weight while creating a comfortable distribution of weight between the shoulders, back and hips. The specially contoured, adjustable 5/8 inch thick neoprene foam padded waistbelt along with our completely adjustable full mesh backband combine to distribute weight evenly on your back and reduce some of the sway associated with frame packs.

| | Capacity | Weight |

| MD | 4415 Cu. In. | 83 Oz. |
| LG | 4789 Cu. In. | 85 Oz. |
| XL | 5152 Cu. In. | 87 Oz. |

Timberline

Designed as an economical alternative, the TIMBERLINE, however, is not alternative to quality nor craftsmanship. We wanted to produce a pack that could sell for less but that would not compromise quality standards by going to a furniture grade aluminum frame or to cheaper nylon fabrics.

The TIMBERLINE is an excellent choice for the new backpacker with every necessary feature that a more expensive pack can offer. Made of our same 420 denier super K Koted eight ounce parapack nylon, the TIMBERLINE bag is divided for convenient organization with a half moon zippered bottom compartment and two large outside pockets with double-stitched nylon coil zippers for easy opening and closing.

A hold open bar is attached directly to our frame, an expensive method that we use on our 'S' frame models, which helps transfer the weight closer to your center of gravity through the frame. The TIMBERLINE also has a handy map pocket that can be used without taking the pack off.

| | Capacity | Weight |

| MD | 2323 Cu. In. | 63 Oz. |
| LG | 2590 Cu. In. | 66 Oz. |
| XL | 2823 Cu. In. | 69 Oz. |

Front Opening 'S' Frame

The ultimate in organization. This pack is for those of you who are tired of searching endlessly for something in your pack. The main body is divided into two panel-opening, double-stitched compartments, for easy, organized access to clothing and food.

Compression bands on the outside can be used to tighten the bag when less than a full load is being carried. There are four large side pockets with ample space for water or fuel bottles. The large top pocket is easy to get to even when an additional stuff bag full of goods is attached to the top of the pack. The extension bar which is attached directly to the frame supports any weight strapped to the top of the pack as well as transferring any additional weight back to the frame.

The FRONT OPENING PACK is equipped with our famous 'S' frame with a full mesh backband and a complete contoured waistband.

| | Capacity | Weight |
|----|--------------|--------|
| SM | 3556 Cu. In. | 81 Oz. |
| MD | 3817 Cu. In. | 84 Oz. |
| LG | 4008 Cu. In. | 87 Oz. |
| XL | 4364 Cu. In. | 99 Oz. |

Sierra Pack

Our goal was to design a simple quality frame pack for all around backpacking and mountaineering use and offer this pack in an intermediate price range without compromising the high quality standards of Wilderness Experience®.

The SIERRA PACK is a large capacity, undivided pack made of eight ounce super K koted 420 denier parapack nylon. The main compartment offers space for large bulky objects. The side pockets are excellent for those quick-to-reach items. The back pocket is a huge top loading cargo pocket capable of carrying a good portion of your bulky lighter weight items.

There are leather strap patches on the top to allow you to strap additional items on. The SIERRA frame is made of the same 6061 T6 aircraft quality aluminum, bent and heliarc welded in our own shop. We use the same generously padded waist and shoulder straps as on the other 'S' frames.

| | Capacity | Weight |
|----|--------------|--------|
| SM | 2888 Cu. In. | 67 Oz. |
| MD | 3219 Cu. In. | 70 Oz. |
| LG | 3593 Cu. In. | 73 Oz. |
| XL | 3896 Cu. In. | 75 Oz. |

Wrap Around Frame Pack

Made of 420 denier eight ounce parapack nylon, the TOP OPENING WRAP AROUND will afford any backpacker or mountaineer years of dependable service.

The main compartment is divided by a horizontal floor; the larger compartment is for carrying your heavier equipment. Access to the lower section is by way of a very convenient half moon double pull zipper, eliminating thrashing about for the lighter items which are often difficult to find in other packs.

A hold open bar helps to support equipment strapped to the top of the pack by transferring the weight directly to the frame. It also maintains the pack's profile, making it easier to arrange equipment. The 6061 T6 aircraft aluminum frame wraps the hips to support the full circling waistbelt, which is designed to pivot independently from the frame. The pivoting action makes this an excellent pack for comfortable hiking or mountaineering.

A History of Quality and Value

Wilderness Experience was born as a manufacturer of fine quality packs. That tradition continues today even though the line now includes a vast array of products to fit the needs of the serious mountaineer or casual hiker.

Within the Wilderness Experience world are packs for everyone. Packs for children and packs for grown-ups. Daypacks that astound you with their functional simplicity. Sophisticated internal frames for the high-grade alpinist. Framepacks for the mountaineer and the tennis shoe wearing trail walker.

Get us a note and we'll send you our catalogs. Each one defines another facet of our exciting and varied line of luggage, sleeping bags, garments, tents, and, of course, packs.

All These Fine Products Are Available At
Your Local Wilderness Experience Dealer.
